DRINKING WATER TAP RANGE

DETAILS, SPECIFICATIONS AND DIMENSIONS OF OUR RANGE OF DRINKING WATER TAPS INCLUDING THE NEW INTERTAP, FRANKE FILTERFLOW RANGE AND ABODE AQUAFIER RANGE
NEW AQUAMATIC INTERTAP

Modern Styling
To suit the majority of modern sinks/kitchens

Fixed Spout
No more cracked plastic ends

7” Spout
Not too long, not too short. Will still reach sink from worktop but not overly long so that it’s in the way. High enough for kettles and carafes but not too high that it overpowers existing tap

Retained Spout
Retained by threaded cap and circlip, not just screwed into body

Long Lever
Easy for the elderly, children or arthritis sufferers

Plastic Internals
Combined with alloy body and brass stud and spout helps reduce cost and lower lead content

Ceramic Disc Valve
For easy, smooth operation and greater reliability. Can also be easily cleaned or replaced in situ

‘O’ ring Base Seal
No unsightly black washers

Intermediate Size
Fits right in the middle of the current range

3” or 4” Stud
With the popular pushfit tail. Simply use large or small lower body to adjust length

Optional Lower Body
Has smaller diameter for tight corners and also allows longer stud for thick worktops
AQUAMATIC INTERTAP DIMENSIONS

Now also available in Brushed Nickel

260mm
240mm
200mm
180mm
120mm

Dimensions in red are for use with small lower body

Hole required in sink/worktop for stud 12mm

B20 Aquamatic Intertap Chrome  B20BN Aquamatic Intertap Brushed Nickel
Duo Faucet Range

The new Duo range are available with the popular pushfit stem plus they are all laser printed with “Drinking Water”, in addition each one will be supplied with both standard and long reach spouts so that you will always have both types available for installation. Simply use which one is required and discard the other. They are also supplied in individual boxes for better protection in transit and in your stores/vans. They are also available with tube attached with either 1/4” or 3/8” tube.

Push-Fit Faucets

Everybody knows that the worst part about installing faucets is getting under the sink to make the tube connection. This faucet is the answer. All you need to do is drill the hole and fit the faucet in the usual way. Then simply attach a 3/8” Speed-fit fitting to the tube (either a straight connector - P110, elbow - P111 or a reducer - P112), reach under and push onto the straight tail of the faucet. Simple and versatile.

Tube Attached Faucets

For those who prefer not to have to crawl under the sink to connect the tube these faucets have a 3’ length of 1/4” or 3/8” tube already attached. All other features are the same as the push-fit faucets above including the dual spouts and laser printing. Please note that if you are installing the 3/8” version you will need a larger wrench and drill bit (or use a cone cutter).

- B15PDUO Chrome Push Fit Duo
- B15PADUO Almond Push Fit Duo
- B15PBDUO Brass Push Fit Duo
- B15PSCDUO Satin Chrome Push Fit Duo
- B15PWDUO White Push Fit Duo
- B15TADUO Tube Attached Faucet Duo
- B15TADUO38 Tube Attached Faucet 3/8 Duo
DUO TAP DIMENSIONS

Hole required in sink/worktop for stud 12mm
3/8TA requires 15mm
6 in 1 Quarter Turn Push Fit Multi Tap

This unique tap brings 6 options in one box. 3 different handles and 2 different spouts means that just one product will provide a choice of 6 styles from 1 box. So easy, so useful, so cost efficient. Your customers will be impressed with the choice. This tap comes with quarter turn ceramic disc operation as well as the popular pushfit stem. Packed in an individual box for protection in transit and storage.

B15QTMULTI  Quarter Turn Push Fit Multi tap
Hole required in sink/worktop for stud 12mm
Quarter Turn Tall Italian Style Tap Chrome
A new addition to the catalogue, this tap brings further choice and style to our range. Like the B15QTMULTI, this tap comes with quarter turn ceramic disc operation as well as the popular pushfit stem. Packed in an individual box for protection in transit and storage. Also has optional long reach spout included.

B16 Quarter Turn Tall Italian Style Tap Chrome
Hole required in sink/worktop for stud 12mm
Franke Filterflow Taps
Franke Filterflow taps are tried and trusted with a well recognized name. All come with all the necessary fittings/valves/connections required for installation. As these taps are made for the UK market, they are suitable for both vented and unvented systems. These are obviously slightly pricier than the imported taps, but the quality and the fact that they are guaranteed and supported nationwide means that you can install these with confidence.

At last we can now buy the Franke taps without their own filter unit. This means a great reduction in price and allows us to use any filter that we wish with them. Should you so desire, their filter is still available as a separate kit and is listed below.

Please note that from now on our part numbers and prices are for the tap only.
FRANKE FILTERFLOW TAPS

B222 Corinthish Chrome tap only
B223 Corinthish Silksteel tap only
B226 Olympis Chrome tap only

GOSFORD 3 WAY TAP

These 3 way taps offer a quality product without a filter so that you can use your own (or preferably one of ours) at a reasonable price. Unlike a lot of cheaper taps, these are suitable for all types of hot water systems. They have 15mm connections for the best flow rates. Filter connection is 1/4"F. Adaptors for both 1/4" and 3/8" tube are included.

B335  Gosford 3 way Tap Chrome
B336  Gosford 3 way Tap Brushed Nickel

Also available to order in Antique Bronze
Gosford Aquifer

Product features:

- Metal construction throughout
- Push the cold lever backwards for crystal clear filtered water, easy to change, high quality carbon filter
- Supplied complete with installation kit and filter cartridge
- Quarter turn handle action for precise flow control
- Anti-splash spout supplied as standard

Additional information / Parts included:

Packaged properties:
- Box length: 430mm
- Box width: 340mm
- Box depth: 70mm
- Units per outer: 5

Tap only weight: 1.875kg
Boxed weight: 2.474kg

Product dimensions:

- Overall Height / projection: 390 mm
- Exit reach: 230 mm
- Exit height: 245 mm
- Centre distance(s):
  - Base diameter(s): 50 mm
  - Recommended hole diameter: Ø 35 mm
  - Max. surface depth: 65 mm
- Spout diameter: 24 mm
- Spout aerator size: 22f

Product flow characteristics:

- Min / Max water pressure: 0.30 / 5.5 bar
- Recommended / Max water temperature: 46°C / 70°C
- Control valve type: Ceramic disc QT
- Product flow characteristics: (C&F / H) dual flow
- Non return valve(s): No, none required
- Aerator type: Flow straightener
- Accepts revolve / spray aerator: Yes
- Spout connection method: Grub screw
- Tail pipe inlet / outlet size: M12 / 15mm Ø
- Inlet pipe type / length: copper rigid tube / 245 mm

Order code:
- Chrome: AT2005
- Brushed Nickel: AT2006
- English Gold: AT2007
- Antique Bronze: Stainless Steel: AT2008
- Chrome & Black: Chrome & White

Warranty Summary (if details available on request):
- Valves and working parts warranted for 2 years
- Surface warranty defects warranted for 1 year

- Regular cleaning will prevent the build up of lime scale and dirt
- After cleaning new thoroughly with standard water to remove any cleaner residue
- Regular cleaning with warm water can also cause damage, so mix with clean water after using. Avoid contact with any abrasives
SWICH

The Swich is a brand new design that will convert any kitchen tap into a filtered water supply as well as its normal function of supplying cold water. The Swich is installed in the sink or worktop and the cold water supply is diverted through the Swich. Here it can then be directed to supply normal cold or filtered water to the existing tap. Comes complete with filter unit and all necessary fittings. Available with either a round or square handle.

B333 Swich Round Handle Chrome
B334 Swich Square Handle Chrome
Swich - round handle

Product features:
- Innovative Patented design adds filtered water to any kitchen tap
- Complete with flexible hoses & pushfit fittings for easy installation
- Metal construction throughout
- Fixing kit designed for thicker surface depths
- Can be installed in any standard 35mm tap hole

Additional information / Parts included:
Normal cold water flow reduced by apx. 20% to conserve water usage
